

PURINA

# GAME BIRD CHOW

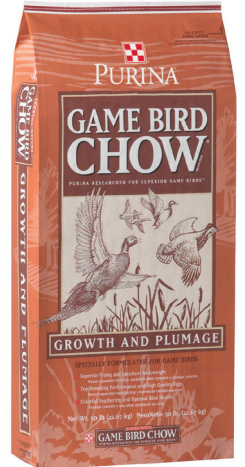

PURINA RESEARCHED FOR SUPERIOR GAME BIRDS

## Purina® Game Bird Breeder Layena® (5438)

Purina Researched for Superior Game Birds

### What It Is...

A complete ration designed to help promote fertility, embryo development, egg production and chick vigor in pheasants, quail, ducks, geese, chukars, guinea hens and other exotic game birds. Purina® Game Bird Breeder Layena® contains a blend of vitamins and minerals to support strong egg shell production. This diet should only be fed to birds that are laying eggs. Begin feeding 2 to 4 weeks before the onset of egg production. Continue to feed during the production season. When the females stop laying eggs, switch those hens to Purina® Game Bird Maintenance Chow until egg production begins again.

### How To Feed...

Feed free-choice as a sole ration to birds from one month prior to egg production until production ceases or until you wish to stop production.

#### Important Considerations:

1. Clean, fresh water should be available to the birds at all times.
2. A feeding program is only as effective as the management practices followed.

#### Caution:

Store in a dry, well-ventilated area free from rodents and insects. DO NOT use moldy or insect-infested feed.
